I am a Back-End Developer 1- years of experience in Java Web developing, Database connections. And I can also say that being able to get along well with people is one of my main abilities

SKILLS

Java SE	PostgreSQL
Maven / Gradle	MySQL
REST	Triggers
J2EE / Jakarta EE	Indexing
Spring	Complex Tabling
Connection pool	Hibernate
JSON Web Token	ORM
OAuth2	RestTemplate
Microservices	Websocket

VERSION CONTROL
JSON , JSP
JIRA
WORKING WITH TEAM

LANGUAGES

ENGLISh - Full professional proficiency

RUSSIAN - Limited working proficiency

UZBEK - Native or bilingual proficiency

EDUACATIONS

3RD ACADEMIC LYCEUM UNDER ANDIJAN STATE UNIVERSITY
Andijan | 2017-2019

PDP IT-ACADEMY
Tashkent | 2020-2021

EXPERIENCES

JAVA DEVELOPER
Java Bootcamp | 2021-present

- Increased service reliability up to 80% by implementing a database connection retry mechanism.
- Collaborated with backend and frontend engineers to develop REST API contracts with Swagger.
- Minimal and optimal use of memory for a given task
- Understands current and web technologies in order to provide technical assistence in developing service application and analyzing database design.

PROJECTS

Warehouse | Product warehouse
- database tables were built using dependency injection, similar to java classes
- the frontend part continues to be executed

App-Chat | A Telegram-like social network
- use as little memory as possible
- convenient models for the convenience of frontend dev

App-Ticked | Backend of ETicked
- programming according to a complex structural scheme
- send various email messages to users ...
